Pre-Operation Instructions

Arrival in Carrier	<p>The cats must be brought to the clinic in either a hard-sided cat carrier or humane live trap. Large dog crates or carriers are not acceptable.</p> <p>One cat per carrier.</p> <p>We prefer tame cats in front opening carriers and barn, feral or fractious-acting cats in traps for the safety of our staff.</p>
General Condition	<p>Cats and kittens need to be at least 4 1/2 + pounds which is about 5 or more months old and in good health. If the veterinarian determines, upon examination, that the cat is not fit for surgery, the cat will be returned to the carrier or live trap that the cat arrived in and owner called.</p>
Food	<p>Take food away by midnight the night before surgery.</p>
Water	<p>Water is OK. If possible, take water away first thing in the morning.</p>
Barn/feral/colony cats	<p>Cats should be confined the night before with a litter pan, if possible, to prevent them from catching breakfast the morning of surgery.</p> <p>A cat in a trap is NOT to be transferred to a carrier. Leave the cat in the trap no matter when it was captured as handling the cat can be dangerous.</p>
Morning Intake	<p>Drop cats off at the clinic at 8:00am. Park in the side parking lot. Paperwork completed prior to the morning helps to make the intake process go smoother.</p> <p>Find the 2 forms needed on the website under the Clinic Info tab at www.catsnipclinic.org. The forms are: Surgical Release and Owner Info Form. If you cannot print the forms, at least look at the forms prior to clinic day for what to expect for services charges.</p> <p>The staff will meet you in the parking lot to take the cat and papers or give you a clipboard with papers to complete. Be prepared to speak with the veterinarian prior to leaving. Wear a mask.</p>
Phone Contact	<p>Your phone must be answered during the day in case the cat is on the surgery table and the staff needs to review the situation immediately with the owner. The phone number used to call you will be either 608-638-6887 or 608-606-3070.</p>
Pick Up	<p>Return to clinic at 4:00pm for pick up.</p> <p>If the cat awakens quicker than 4:00pm, the clinic may call for an earlier pick up.</p> <p>The clinic accepts cash, check, or debit/credit card. If a card is used, a convenience fee will be added to the invoice.</p>
